Abstract

- 5 The present invention relates to a process for preparing a palladium(0) compound, comprising the reaction of a palladium compound with one or more compounds of the general formula I, II or III in the presence of a base:

- 10 Term-O- $\{[\text{Si}(\text{R}^{16})(\text{CR}^{19}\text{CR}^{17}\text{R}^{18})\text{O}]_v[\text{Si}(\text{R}^{20})_2\text{O}]_w\}$ -Term (III).

The Palladium(0) compounds are suitable as homogeneous catalysts, as a precursor for preparing homogeneous catalysts, as a precursor for preparing homogeneous catalysts in situ or as a precursor for preparing
15 heterogeneous catalysts.
